

The PATROL SKETCHBOOK

By I. SHKOTKAY

1992

"SCOUT STAVE" OR HIKING STICK

Heavy duty rubber band

utility hook for a variety of uses, retrieving items, picking fruit, etc.

Peepholes drilled at right angle to each other for laying out a 90 degree corner.

Brass tack at five feet

Sketch after Baden-Powell

... as a fishing pole

Twenty to thirty feet of parachute cord or nylon cording as a hand grip and emergency line.

... as a cooking tripod

grooves for five-mile hikes.

Brass tack and groove at three foot point (mid-point of staff for six foot length)

Fifty feet of fishing line around two band-aids and fish hook.

Brass tack and groove at two foot mark.

... as a hiking stabilizer

Brass tacks at hinch on center as inch scale and emergency nails.

Grooves for number of nights camped

Brass tack at one foot mark.

... You will be surprised at how many tasks a good hiking stick can perform. Don't be without one when your patrol sets out!

SIZE:

- Approximately one inch in diameter.
- Five to six feet in length.

Grooves at one inch on center to continue inch scale.

Rubber furniture leg tip.

SOURCES:

- Tree limb trimmings
- Wooden closet rod material (lumber yard)
- Implement handles (hoe, rake, etc.).
